GENERAL INFORMATION

Description: Repels mosquitoes and ticks. Mosquito Barrier is a concentrated garlic juice solution that is sprayed on plants, shrubs, and turf to repel mosquitoes and ticks. Odourless in hours.

How it works: Mosquitoes and ticks are repelled by the odour of Mosquito Barrier almost immediately after spraying.

DIRECTIONS FOR USE

DO NOT contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes.

Shake well before using. Mix Mosquito Barrier in water at the rate of 30 mL/L. If mosquitoes and ticks are already present, it may be beneficial to double the amount of Mosquito Barrier per litre of water. To aid mixing and spreading of the spray solution, especially if you have hard water, up to 10 mL of mild liquid soap (do not use detergent) per litre of water may be added. If a sticker is desired to aid retention of the product on the plants, up to 20 mL of vegetable oil (canola or corn oil; do not use soybean or peanut oil) with up to 10 mL of mild liquid soap per litre of water may be added. If adding soap or vegetable oil and soap, mix well with undiluted Mosquito Barrier, then dilute the mixture in water and stir well. No danger to plants is expected if label directions are followed, but test on a small area if in doubt about the sensitivity of a particular plant. For best results spray in early morning or early evening. Avoid spraying in the heat of the day. Spray all foliage with a small spray droplet size until run-off. Use in areas that attract mosquitoes and ticks such as grass, plants, shrubs and under wood piles, decks and porches. Re-apply after heavy rain or if mosquitoes and ticks continue to be a problem. Spraying for tick nymphs should start in late spring or early summer.

PRECAUTIONS

KEEP OUT OF REACH OF CHILDREN

Do not swallow. Avoid getting on skin and in eyes.

May cause skin and eye irritation. Avoid inhaling/breathing mist or vapours. Potential skin sensitizer. Apply only when the potential for drift is minimal. Individuals who are sensitive or allergic to garlic should avoid handling Mosquito Barrier. Individuals who are sensitive or allergic to garlic should avoid treated areas until dry or after a heavy rain.

Do not spray on Blue Spruce trees.

FIRST AID

If swallowed: Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice.

If in eyes: Hold eye open and rinse slowly and gently with water for 15–20 minutes.

Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.
